## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-16 and 22-24, drawn to a light emitting apparatus, classified in class 313, subclass 506.
- II. Claims 17-21, drawn to a manufacture of a light emitting apparatus, classified in class 445, subclass 24.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the device as claimed could be manufactured by different manufacturing processes. For example, the bank could be created by the use of a mask and not by etching. Further the device could be formed without transporting the substrate to a second installation site.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Jeffrey Costellia on 5/10/2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 2879

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
